FEATURES & BENEFITS

■ FITS EXISTING STRUCTURES

Crimsafe Bifold doors can be added to existing glass bifolds creating a secure, insect free doorway.

■ CONCEALED FASTENERS

Snap-in covers conceal the product's fixings to enhance the smooth looks of the patio enclosure.

■ SCREW-CLAMP™ SECURITY

Only Crimsafe clamps 304 Tensile Tuff® Security Mesh between 2 serrated pieces of metal, then drives a screw right through both mesh and frame to ensure a vice-like grip.

■ TAMPER-RESISTANT SCREWS

Exclusive to Crimsafe. Screws can only be applied or removed by a tool registered with Crimsafe.

■ ENHANCED LIFESTYLE

Crimsafe provides unhindered views, keeps out mosquitos, and lets you keep a cool, safe house in summer while adding an outside room.

■ BLOCKS HEAT TRANSFER

Blocks out 53% of solar heat gain through windows, keeping your home cooler in summer and warmer in winter. Save on power by reducing running cost of air-conditioning.

■ AUSTRALIAN STANDARDS

Crimsafe always exceeds the relevant Australian and industry standards for security.
